**Subject:** M/047/002 Geokinetics - site status

Joelle,

I received a call today from Mickey Schott of Geokinetics. He had a copy of the memo for the Division's inspection of 4/12/96 and was wondering what the company needed to do to close out this file. The memo had a surety estimate adjustment attached, and after having him read through that, it seems some reclamation is still needed at the site. It sounds like monitoring wells need to be plugged, water wells need to be decommissioned, some earthwork performed, and seeding.

Mickey can be reached at 210-821-7041 today (Mon. 6/5) until tomorrow noon (Tue. 6/6). After that, please call him at 713-850-7600. They are planning a trip to Montana and could visit this Seep Ridge site as early as Thur. 6/8 if convenient. They have just recently made their rental and royalty payment to SITLA.

I told him I would review our files to confirm the status of the site and also contact John Blake at SITLA regarding any concerns they may have. I agreed to call him before noon on Tuesday. He mentioned that Mike Hale is no longer with the company, however, Mike is available to them for consultation regarding the site or even a site visit.

PLEASE SEND A COPY OF THIS TO FILE M/047/002 & NOTE THE NEW OPERATOR CONTACT AS MICKEY SCHOTT.
